

SPECIALTIES STRONG STOCK MARKET FEATURE

Standard Railroads and Industrials
Are Heavy, Declining From
Fraction to a Point.

AMERICAN LOCOMOTIVE STEADY

Reported Company Has Secured
Contract for 100 Engines From Russia.
Quicksilver Breaks Into Limelight
With Heavy Sales.

NEW YORK, June 14.—Specialties were the strong feature of today's stock market, which continued with the heaviness of the standard railroads and industrials which declined from a fraction to a point, while the specialties were in most cases due indirectly to war orders, while the ease of the standard issues resulted from offerings of long stock.

At the opening the market was steady, with most issues showing fractional gains. A reaction set in about town buying orders that came in over Sunday resulted in a subsequent rally, but stock was heavily supplied, and with the result that before the end of the morning session most of the gains had been wiped out and small fractional losses established.

During the noon hour and up to 2 o'clock the market did little, except for a sharp rise in American Can to 1-5/8, the highest price in its history. Shortly after the beginning of the last hour, offerings of standard shares, together with short sales by the room element, depressed prices from 1 to 2 points, and the market closed lower.

In the last half hour there was a slight rally, and the list closed steady. Among the specialties, the American Locomotive held steady, owing to a report that the company had secured an order from Russia for the construction of 100 locomotives.

Quicksilver broke into the limelight with heavy sales and an advance in price of nearly 100 per cent compared with Saturday's closing. The common advanced from 1-1/2, the low point for this session, to 2-3/4, the preference went from 2-3/4 to 3-1/8. Advance of the shares is due to the increased business of the company. The property of this company, now operated by a lease by the Quicksilver Investment Company, the latter paying 20 per cent of the earnings to the Quicksilver Mining Company. An officer of the company said today that the price of Quicksilver had advanced to a peak, as against about \$25 a share last summer before the outbreak of the war. The company's business has also increased materially because of the Quicksilver in Europe has been commandeered, thus leaving the Quicksilver Mining Company to supply the demand of this country. Owing to the recent reorganization of the company, the Quicksilver Mining Company, an assessment of \$1.50 a share, and the preference of \$1.50 a share, the company is well supplied with working capital at a time when the demand for its product has increased materially.

Notwithstanding that Quicksilver is in receivership, United States Reduction and Refining Company stock had a sensational advance, rising from 3-1/8 Saturday's close, to 10-3/4. Subsequently it reacted 4-1/2 points.

At Savannah, Ga., where company stocks and bonds were strong, owing to heavy foreign orders being received by the company.

Bond market continued to be buoyed by large orders placed from Russia.

Conservative interests said the supplying of stocks to-day seemed to be with the consent of the large banking interests, and that a recession was healthy, as it improved the technical position of the market.

NEW YORK, June 14.—Low-priced specialties in which public support has at no time been keen were the feature of today's market. With the exception of United States Steel, the usual leaders dropped into the red, and the market for the specialties was relatively heavy.

Some shares were up to 2 to 3 points on the order of the market, and the market backward, despite reported sales of the refined metal at 20c for domestic contracts, with the new high price of steel for lead.

Steel stocks were variable when not high record of 47%.

The one exception was the so-called Virginia steel certificates, which rose from 3-1/2 to 4-1/2, and the market for these certificates was relatively heavy.

At the time of the exchange situation in the market, there was a new record for sterling to 47 1/2, a new low record for bonds were firm, but without special feature. United States bonds exchanged on call.
